Module Nine

AI in Business

You don't have to figure out everything at alone.

You don't have to use AI. Like anything in business, it's a free resource, not a requirement or necessity. This section is here if it's something your interested in or is useful to you.

BEFORE YOU READ ANYTHING

What do you think AI can support you within your business? Don't look anything up, just write what comes to mind

What do you think you would use it for?

What would you like to keep doing yourself? And why does this matter?

A free reference guide with starter prompts is included with this module as a separate resource

WRITE YOUR FIRST PROMPT

Pick on task from your list above. Write a prompt you could use right now in an AI platform
