Welcome

Before we start.

No need to be ready. No need to have it together. Just notce where you are.

SOMATIC CHECK-IN

What do you notice right now?
Close your eyes for a moment. Take a breath. Notice what's in your body - tension, excitement, heaviness, readiness. Whatever's there is allowed to be there.

REFLECTION

What brough you here? Write it without editing. No one is marking this.

INTENTION

What does Solid Ground look like for you? At the end of these modules - what's different?
What does it feel like to have it?

ONE THING

One thing you want to stop doing alone

> The one rule: done beats perfect. Come back when you forget.
